

## **Course Outcomes (COs) for the UG Programme in Education**

Upon successful completion of the undergraduate programme in Education, students will be able to:

1. **Understand foundational concepts** in education, including its philosophical, psychological, and sociological dimensions, and appreciate the scope, aims, and forms of education.
2. **Apply theoretical knowledge** to practical educational situations, including child-centric pedagogy, inclusive education, educational psychology, and classroom management.
3. **Analyze educational processes and policies** through the lens of constitutional values, human development theories, and cultural-social contexts.
4. **Evaluate the impact of educational thinkers and ideologies**—both Indian and Western—on modern educational practices.
5. **Develop professional skills** such as classroom observation, social awareness programme planning, and leadership in educational settings.
6. **Use educational research methods and statistical tools** to analyze data and contribute to evidence-based decision-making in education.
7. **Demonstrate the ability to plan, execute, and assess educational programmes** including curriculum design, evaluation strategies, and school management.
8. **Engage with contemporary issues in education**, including sustainability, human rights, globalization, national integration, and technological transformation.
9. **Prepare for careers in education and allied sectors** through internships, fieldwork, and exposure to multidisciplinary perspectives.
10. **Cultivate values of equity, justice, inclusivity, and lifelong learning** as guided by the Indian Constitution and National Education Policy (NEP) 2020.
